

Smart Blind Stick: Navigation & Health Monitoring System

Enhancing mobility and safety for the visually impaired with cutting-edge navigation and health monitoring technology in one smart device.

Made with **GAMMA**

Introducing the Smart Blind Stick

Revolutionary Solution

A transformative mobility aid combining navigation and monitoring for enhanced safety.

Integrated Features

Navigation support and health tracking work seamlessly together.

Improved Independence

Empowers users to travel more confidently and live actively.

Features and Functionality

GPS Navigation

Provides precise route guidance tailored to user needs.

Fall Detection & Alerts

Automatically notifies emergency contacts during falls.

Obstacle Detection

Haptic vibrations alert users to nearby obstacles.

Health Metrics

Monitors heart rate and body temperature continuously.

Integrated Navigation System

Voice Guidance

Real-time spoken directions with customizable routes for personalized navigation.

Digital Maps & POIs

Interactive maps highlight nearby points of interest and landmarks.

Transport Integration

Connects with local transit apps to provide seamless travel assistance.

Geofencing Safety

Defines safe zones and alerts users when exiting designated areas.

Health Monitoring Capabilities

1

Heart Rate Alerts

Continuous monitoring with notifications for irregular patterns.

2

Temperature Tracking

Detects fever early, aiding proactive healthcare.

3

Activity Monitoring

Tracks steps, distance, and calories burned to encourage movement.

4

Mobile Sync

Health trends are logged and accessible via smartphone app.
